📁 Projects

E-commerce Gift Shop ☑

Fantasy

Established and managed an e-commerce gift shop, overseeing the end-to-end operations. Successfully curated and marketed a diverse range of products, optimized the user interface for a seamless shopping experience, and implemented secure payment gateways. Achieved increased sales and customer satisfaction through effective online presence and personalized customer service.

Online Election System

Designed and implemented a secure online voting system with user-friendly features, incorporating face recognition for enhanced security. Developed a login system, simplifying the voting process, and utilized biometric face recognition to minimize fraudulent ballots. Conducted background research, documented system analysis, and created a prototype with a comprehensive interface design.

Club registration website

Multimedia university

Developed and launched a user-friendly club registration website for Multimedia University, streamlining the process for students to join various clubs. Implemented intuitive features to facilitate easy navigation and registration, ensuring a seamless experience for both students and staff. The platform enhances efficiency and accessibility, contributing to a vibrant and engaged student community.

Landing page for Tech Company

Different Tech

Designed and crafted an impactful landing page for a prominent tech company, showcasing cutting-edge products and services. Implemented a sleek and user-centric interface to enhance the user experience and capture visitor engagement. Leveraged strategic design elements and persuasive content to effectively communicate the company's value proposition and drive conversion.
